

## Metro Blooms: Our Vision and Work

Metro Blooms' mission is to partner with communities to create resilient landscapes and foster clean watersheds, embracing the values of equity and inclusion to solve environmental challenges. We partner with residents, neighborhood groups, small businesses, youth, elders, nonprofits and local governments, to co-create natural outdoor spaces to help mitigate the effects of climate change — supporting pollinators and people along the way.

## Blue Thumb: Education and Partnership

Blue Thumb is the education program of Metro Blooms and a partnership of local governments and private partners working to plant for clean water and pollinators. Through Blue Thumb, Metro Blooms collaborates with partners to offer workshops, programs, and DIY resources on pollinator plantings and stormwater management for residents across Minnesota. This includes the statewide Lawns to Legumes individual grant program and our Sustainable Landcare Training.

---

## Together We Can Make a Bigger Impact

**Funding from your sponsorship would allow Metro Blooms to:**

Transfer 20% of funding directly to residents in BIPOC, low-income, rental, and EJ communities that participate in our projects.

Expand our educational materials and resources for out-of-metro audiences (e.g. rural communities and Northern MN).

Evolve our programs to be more inclusive of historical and Indigenous knowledge and landcare practices often left out in education.

Create more robust shoreline restoration resources and expand the reach of our Resilient Shorelines workshop to protect the health of our 10,000 lakes.

Develop and grow partnerships with values-aligned multi-family and affordable housing organizations, including tenant advocacy groups.

Stay meaningfully engaged with communities as a trusted resource, providing continued investment in the neighborhood as needs arise.

## Marketing Sponsorship

### Audience: MN Residents

Boost your marketing efforts through our social media, websites, newsletters, in-person events, and more. Whether you are trying to increase native plant sales or gain more design-build projects, reach thousands of project-ready residents in the Metro and statewide.

Optional add-on to be Blue Thumb's exclusive "Butterfly" State Fair exhibit sponsor for \$1,500 (reach: 210,000+ visitors to the Eco-Experience building)	 		

## Sustainable Landcare Training Sponsorship

### Audience: Local Government Partners, Participants

The demand for a skilled workforce in the green economy is growing, and the City of Minneapolis has set a goal to prepare 1,000 residents for green jobs by 2030. By supporting this program, you can play a pivotal role in building the next generation of environmental stewards. Your sponsorship will directly support young adults in acquiring the hands-on skills needed to maintain and care for native plants — an essential element of green infrastructure that protects our lakes, rivers, and communities. Together, we can equip young people with job-ready expertise while advancing sustainable practices that benefit both communities and our earth.

## Event Sponsorship

### Audience: Donors, Community Members, Curious Gardeners

Partner with Metro Blooms to support our mission of creating resilient landscapes and fostering clean, healthy watersheds. Our events bring together a dynamic mix of engaged supporters and curious individuals eager to learn about sustainable landcare practices. With a combination of virtual Community Coffee Chat events, and our signature fundraising event, we connect with hundreds of participants annually, providing sponsors with meaningful opportunities to engage with a passionate and growing community. Your sponsorship enables us to make a meaningful impact for the environment and the people who care for it.
